

## Multi-Touch Interactive Display

Kb Port's MP-1 revolutionizes the way simulation centers are collaborating. From debriefing to multi-site collaboration, the MP-1's multi-touch interactive 55" display allows both local and remote viewers to control your simulation software. Its Hi-Definition display makes it easy to see those little details that are important when training a medical professional.

## Debriefing

Debriefing is the key to a student's success and understanding when it comes to education. Using the MP-1, simulation videos can be reviewed and students can be critiqued with little effort. Kb Port software allows you to stream live video and control simulation recording right from your MP-1. With built-in whiteboard features, it makes for the perfect teaching and debriefing tool.

## Distance Learning

Whether you're separated by time and distance, or you need to alleviate capacity restraints, the MP-1 allows you to collaborate with colleagues around the world. The Hi-Definition display and video conferencing technology make you feel like you're really there and lessen the amount of expenses associated with traveling. Local and remote viewers can share control of the simulation via a PC, Smartphone or tablet PC.

## Key Features

- Hi-Definition (1080p) multi-touch interactive 55" display
- Interactive Built-in Whiteboard
- Hi-Definition camera for video conferencing
- Built-in sound bar and microphones for superior audio
