

Advanced Portable ETC Pro+

Our Advanced Portable ETC Pro+ system is excellent for those who have to train on the move and don't have the comforts of a fixed lab. Without sacrificing portability, the advanced system has the ability to archive movies and fulfill your scheduling, inventory and assessment needs. The system runs on a compact, lightweight laptop easily stowed and transported in a hard case to your next training environment. It also utilizes the most up-to-date wireless technologies increasing its portability and usefulness as a teaching and debriefing tool.

The latest advance in medical simulation technology from Kb Port comes in the form of the ETC Portable. This fully-featured ETC Recorder is equipped with components of the portable workstation—now in a convenient and compact package. In addition to being fully compatible with Gaumard Hi-Fidelity Simulators and Laerdal Hi-Fidelity Simulators, ETC Portable even boasts Dual Simlink capabilities. This patent pending technology allows instructors to link the system to two simulators at once and capture multiple log files within a single recording session. Everything necessary for simulation recording fits inside and is protected by an included carrying case.
